Code Compliance With Regards To Child Day Care Inspection Forms

Code: 2012 Building Code
Section: 426

Date: October 15, 2015

Question:

On the DHHS – Division of Child Development day care facility inspection form, can I check the box indicating “current code compliance” as “yes” if the building was used as a day care prior to the new licensing that requires the completion of the form?

Answer:

Yes, if the building meets the code under which the day care facility was licensed originally. Chapter 34 is the basis for this approval and should be noted on the form. When Chapter 34 becomes obsolete, the 2015 NC Existing Building Code will become the basis for approval.
