

## Reporting AFFF Foam use

- The NC legislative mandated that all Fire Service agencies across North Carolina **SHALL** report the AFFF foam in their inventory and every time that it is used to NCDOI – Office of State Fire Marshal Office.
- This is to be documented in the state's ImageTrend Elite database.

# How to report the use of AFFF Guide

- This is a step-by-step guide for an agency, that doesn't use ImageTrend Elite, to get to the form to report that you used AFFF foam during an incident call.

*\* This is only done when you used AFFF foam.*

This will **NOT** replace your full NFIRS data report that you will do in your reporting software and send to the state.

*You will reach out to OSFM to get a login to access ImageTrend Elite. The last page of this guide will tell you who to call or email for your agency log in.*

**<https://www.ncosfm.gov/osfm-24>**

You will always go to the above website link to access ImageTrend – Elite

**Image Trend Elite - The New NC  
OSFM Reporting Management  
Software Program!**

North Carolina Office of State Fire Marshal  
supported, internet based comprehensive NFIRS  
5.0 compliant records system.

 **Attention!**

**UPDATE:** All users have been successfully migrated from Fire Bridge into Elite.

**Locations, Occupants, and Inspections, and Permits** have been successfully migrated as of 9/14/21. Inspections Users may now document their Inspections in Elite.

**Checklist Questions and Resources** have been migrated as of 9/17/21, however Checklists will need to be rebuilt under Tools > Checklist Manager, as previous checklist data is not able to be migrated into Elite.

# Condensed Fire Form w/AFFF (non-direct Entry Agencies)

#1 - Click on Incident Tab

#2 - Select the Condensed Fire Form w/AFFF (non-direct Entry Agencies)

The screenshot displays the ELITE software interface. At the top, the 'Incidents' tab is selected, indicated by a red arrow labeled '1'. Below the navigation bar, the 'Create New Fire' section is visible. In this section, the option 'Condensed Fire Form w/AFFF (...)' is highlighted with a red arrow labeled '2'. Other options in the 'Create New Fire' section include 'Deploy Fire Form w/AFFF', 'Cancelled Call', and 'Switch To'. The 'Switch To' section lists various options: 'Locations/Occupants/Inspections', 'CQI', 'Fire Investigations', 'Inventory', and 'Checklists'. The left sidebar shows 'View Existing' options: 'EMS', 'Fire', 'EMS/Fire', 'Field Incident Cloud', and 'Elite Field Login'.
