11:00AM – 12:00PM	NFPA Updates Kelly Ransdell, Director, NFPA Public Education, NPFA	White Pines Ballroom
12:00PM – 12:15PM	Conference Door Prizes, Closing, and Wrap-up Allan Buchanan, Director, Safe Kids North Carolina Safe Kids North Carolina Staff	White Pines Ballroom

Conference Schedule

Monday, May 19th

NC CPS Program Update
Allan Buchanan, Director, Safe Kids North Carolina
Bevan Kirley, Senior Research Associate, UNC Highway Safety Research Center

Child Passenger Safety Manufactures’ Update #1 (1 CEU)
Chicco, Courtney Berry
Child Source, Alan Mobus
Cybex, Jessica Norris
Dorel Juvenile Group, Daniel Dias
Evenflo, Patsy Pilcher

Child safety seats are constantly evolving, and CPS technicians work daily to ensure caregivers know how newest child restraints work to protect children. Get the latest updates directly from each child restraint manufacture learning about the newest technology and products in the field.

Child Passenger Safety Manufactures’ Update #2 (1 CEU)
Joie Baby, Claire Smith
Kids Embrace, Tony Jerisha
Nuna, Bob Wall
Safe Traffic System, Vera Fullaway

As a first responder/health care worker, it’s critical to understand how to best approach situations involving someone living with dementia. Join us to learn about detection, causes, risk factors, stages, and treatment of Alzheimer’s disease. The program will cover talk tactics and information on likely 911 calls that may involve an individual living with Alzheimer’s or another form of dementia.

CPS Manufacturer’s CPS Hands-On Challenge (1 CEU)
Complete the CPS Manufacturer passport to earn 1 CEU. Must be completed by 3pm Tuesday.

Tuesday, May 20th

Safe Kids North Carolina Conference Opening
Concord Fire Department Honor Guard
Melanie Jordan, Concord Fire Department
Jake Williams, Chief, Concord Fire Department
Brian Taylor, State Fire Marshal
Allan Buchanan, Director, Safe Kids North Carolina

MACPS
Courtney Barry, Chicco, Child Passenger Safety Advocate
As the popularity of online shopping increases there have been increasing reports of non-compliant, knock-off, fake and foreign car seats getting into the hands of US consumers. As a car seat technician, how can you tell if a car seat is not compliant with FMVSS 213? This session will review what is required of a compliant child restraint and will provide tips for how to spot a questionable product. Additionally, this presentation will review options for reporting questionable products, as well as messages to share with concerned caregivers.

No Silver Bullet: Promising Practices in Gun Violence Prevention for North Carolina
Tricia Smar, Adult Injury Prevention Coordinator, Duke Trauma Center
Firearms have become the number one cause of death for children, surpassing motor vehicle crashes which have been declining for 20 years. Myriad approaches to MVC prevention account for that drop, including research to improve vehicle safety as well as car seat.

Manufacturers and Recalls: Responsibilities, Actions and Curbside Messaging – (1 CEU)
Vera Fullaway, Safe Traffic System, Inc.
Overview of the regulatory process of recalls. During the discussion, participants will learn about the specific roles of NHTSA, CRS Manufacturers, CPSTs and caregivers in how end-user safety is improved through the regulatory process. Learn about the many mandated and voluntary steps in recordkeeping, reporting and communication regarding product integrity and safety.

Gun Safe Locks
Jared Pone, NC SAFE, External Affairs Manager with the North Carolina Department of Public Safety, office of Juvenile Justice and Delinquency Prevention

Session Details

Tuesday, May 20th (cont.)

Who Wants to be a Millionaire CPS Edition – (1 CEU)

Bob Wall, Nuna, Global Car Seat Safety Advocate

In the scope of the changing world of occupant protection, the design and testing of cars and car seats have come a long way. Developing trends in safety have made some critical and important improvements is the way cars safety features and car seats distribute crash forces. These designs have made vehicles and car seats even safer and are becoming more a standardized in the field. While some of these designs and features are not new to the field, they have taken on a new interest because of demand for “safer” modes of travel. This inner active gameshow platform tests the participants knowledge about car seats features and common questions from caregivers and basic information.

Water Safety in our Community

Larissa Koerschner, Alligator Steps Swim School, Owner

Laure Hill, Alligator Steps Swim School, Aquatics Manager

We are proud members of 'Stop Drowning Now' - Our mission is to empower individuals and communities with the knowledge, skills, and resources needed to prevent drowning incidents. Join us in making water safety a top priority and ensuring that every person has the tools to enjoy aquatic activities safely.

Recall Rundown: Essential Insights for CPSTs on Car Seats and Vehicle Safety Recalls – (1 CEU)

Lonny Haschel, Senior Program Manager, Mobility Safety Roadway Safety Program, National Safety Council

Leave preconceived notions about vehicle safety recalls at the door. This 60-minute session will provide technical information to participants in various aspects of vehicle safety recalls that directly affect child safety seat installation. Participants will gain in-depth knowledge from technical service bulletins of specific safety recalls involving lower anchors, top tethers, seat belts, head restraints, and other vehicle components that can interfere or prevent proper child safety seat installation and the ramifications of these recalls on child occupant safety. Participants will also learn about other vehicle occupant protection safety recalls, with technical insights about the reason for the recall and the significant risks to children in child safety seats, emphasizing the importance of addressing these issues to prevent serious injuries.

Understanding Alzheimer's and Dementia

Alexandra Beichner, Alzheimer's Association, Program Manager

This program offers a deep dive into understanding Alzheimer's and dementia then we explore how to implement that knowledge into your role as a first responder. This program details potential 911 calls you may encounter, how to respond as well as tips and strategies for working with individuals living with the disease.

Wednesday, May 21st

Little Hands Exploring Can Make Big Problems

Maureen Nsofor, Junior Faculty Fellow in the Emergency Medicine Department at Levine Children’s Hospital

This session will be taught by a Pediatric Emergency Room Physician. Attendees will learn the nature of the dangers and outcomes from button batteries, plants, laundry pods, magnets, coins to small children in the home. What information might be shared with parents to best help you educate your communities families and caregivers. Also learn some common case presentations to understand what might be happening in the home and what parents can do before going to the emergency room. Resources will be provided that you can share in your communities!

Steps to Prevent Sleep-Related Infant Deaths

Megan Canady, Research, Associate, UNC Collaborative for Maternal and Infant Health, Safe Sleep NC

The third leading cause of infant death in North Carolina is associated with unsafe sleep environments. These deaths are preventable. Come learn about new resources and strategies that you can bring back to your agency and community to prevent these deaths. Also, learn how to work with families who are reluctant to follow safe sleep recommendations.

Youth Firesetting Programs & Resources

Amy Rea, Senior Charlotte Fire Department, Fire & Life Safety Educator

Maria Bostian, Charlotte Fire Department, Fire & Life Safety Educator

Alma Solis, Charlotte Frie Department, Fire & Life Safety Educator

Christie Russel, Charlotte Fire Department, Fire & Life Safety Educator

This training course will explore the current youth fire setting prevention and intervention practices utilized by the Charlotte Fire Department, with a focus on equipping fire service personnel, community organizations, and other stakeholders with the knowledge and tools necessary to address youth fire setting behavior effectively. We will cover a broad range of topics, including best practices, practical solutions, and training resources that can be used by fire departments, first responders, and related agencies. The presentation will also provide a forum for active discussion on the array of local, state, and national resources available for addressing youth fire setting behavior.

Wednesday, May 21st (cont.)

Test Driving the National Digital Check Form

Alex Wilkins, Community Risk Reduction Specialist, NC Office State Fire Marshal

The National Digital Car Seat Check Form is a free HIPAA-compliant resource available to all certified Child Passenger Safety Technicians. Available on paper or an electronic platform, this program walks a technician through a structured car seat check, streamlining data collection so that important information is captured along the way. CPSTs and program managers can easily download their seat check data in a format that reduces reporting burdens, allows for monitoring trends, and tracking car seat distributions.

Pediatric Vehicular Heatstroke: Resources, Advocacy & Action

Claudia Summers, Program Manager II, National Safety Council Program Manager

Deaths from vehicular hyperthermia continue to plague our news feeds each year. Why does it happen? How could it happen? The answer may surprise you. In this session, we will do a deeper dive into these deaths and learn resources you can use to engage your community in prevention.

The Strategy Behind Public Safety Communications

Victorian Simmons, Town of Apex

Whether your department is working to get public educational messages out, retaining employees, recruiting new talent or looking for strong community engagement, successful communications is at the backbone of a good organization. Through social media, event outreach and photographs you can make your department stand out amongst others.

Rail Safety in YOUR Community and State

Margaret Cannell, NC Operation Lifesaver; Ain Flowers, NCDOT Rail Division

NCOL will provide statistics, information, and resources to promote rail safety in your community. NC routinely ranks in the top 15 states in rail incident statistics. OLI offers presentation materials, handouts, posters, videos, and other resources for every age, from pre-K through adults. All materials and presentations are provided free of charge.

Occupant Protection at Any Age and at Every Stage

Kristel Robison, Senior Research Associate, UNC Highway Safety Research Center

Shannen Johnson, UNC Highway Safety Research Center, Junior Research Associate

As child passenger safety professionals, we understand how critical proper restraint and safety seats are when transporting young passengers. We also understand how installation of car seats can potentially impact the front seat passengers, particularly in smaller vehicles. Knowing this, how can you better balance the needs of all passengers, each of whom deserves to be protected during transport? This is where programs like CarFit help assist in that mission, and can work in conjunction with child passenger safety, so everyone is safe in the vehicle. CarFit is a national program that promotes safe driving and mobility by focusing on safety, comfort, and fit in a driver's personal vehicle. Trained CarFit Technicians educate drivers on key areas of occupant protection such as airbags, seat belts, and head restraints as well as vehicle adjustments (mirror, seat position, steering wheel tilt, etc.). Although the program is geared towards older drivers, these safety points are important for everyone, including children transitioning out of boosters, new drivers, and those trying to maintain the best safety practices while on the road. By merging key concepts from CarFit with CPS expertise, we can better recognize the impact that can be made across generations to ensure all riders are safe, regardless of where they are sitting. Safer drivers at any stage make for safer occupants at every age.

Using AI to Enhance Educational Messages and Outreach

Brene Ball, Pinecroft Sedgefield Fire District, Fire and Life Safety Educator/Digital Content Specialist

Artificial intelligence (AI) tools have been all over the internet for the past few years. By now you have seen many pop up and may have already used some to see what they can do. Did you know they don't have to be a scary tool? As an educator, you can use these AI tools to build educational messaging to fit specific audiences, help analyze data and create digital content and even use them to save you time as you work on your outreach programs. This 90-minute session will introduce participants to examples of how these tools work, how they can be used to increase productivity and take data collection and analysis to the next level. Participants will walk away with a list of new tools to integrate into your own programs.

Adolescent Resources

Kelly Ransdell, Director, NFPA Public Education, NPFA

Middle school and high school students can present challenges because they are different than young kids and adults. This session will explore young minds and how to customize messages to reach these young minds.

Off the tracks...the Deadly Reality of Train Accidents

Roger Smock, Rail Safety Consultant, Rail Division, NC Department of Transportation

This presentation will provide an introduction for health care educators, safety care educators and public safety professionals about the growing epidemic of train related injuries and deaths across the US and NC. Attendees will learn to dispel deadly myths about trains.

Session Details

Wednesday, May 21st (cont.)

Car Fit #1 – (Must take parts 1 and 2)

Kristel Robison, Senior Research Associate, UNC Highway Safety Research Center
Bevan Kirley, Senior Research Associate, UNC Highway Safety Research Center
CarFit is a National educational program developed by AAA, and the American Occupational Therapy Association. The program enhances the safety and comfort of older drivers through a 12-point checklist guided by trained volunteers. CPS professionals can integrate CarFit into their community programs to improve older driver safety. In this interactive training, participants will learn how to conduct CarFit sessions effectively. The training includes classroom instruction and outdoor practice sessions. Join us to empower older drivers and enhance road safety! Visit <https://car-fit.org/> to learn more about the program.

How to Obtain the Extra 5.5 Community Risk ISO Points

Jeremy Hunt, NC Office State Fire Marshal
How to obtain the Extra 5.5 ISO Community Risk Points is a program geared for community risk personnel who are working to reach the public and earn the rightly due points their agency deserves. This presentation allows us to take a deep dive into ISO Community risk points – what are they and where can we find them. Are you leaving points behind, by not knowing what is credible or not. Our presentation will allow for group discussion for the collaboration of ideas amongst all disciplines.

Keeping Families Connected

Lauren Crafton, ROTH ID TAG, Owner
Lauren Crafton will share the story that led her to become a CPST and create the ROTH ID TAG™, a universal emergency identification system for child passengers. Her presentation will explore the story behind the company’s development and the gaps in emergency contact information for child passengers. Lauren will discuss how the ROTH ID TAG addresses real-world challenges that first responders encounter, offering an easy-to-use solution. Focusing on the CPST perspective, Lauren will explain how they have collaborated with industry experts to develop a product that integrates seamlessly into safety protocols with a simple design. Attendees will learn how the product is a practical resource, helping CPSTs ensure that children’s emergency information is always accessible in the event it is needed. She hopes the ROTH ID TAG will help reduce the trauma of an unidentified and scared child following a vehicle accident for both the child and the first responders. By the end of the presentation, CPSTs will leave with actionable insights on how the ROTH ID TAG complements their work, making it an essential addition to their child safety programs tool kit.

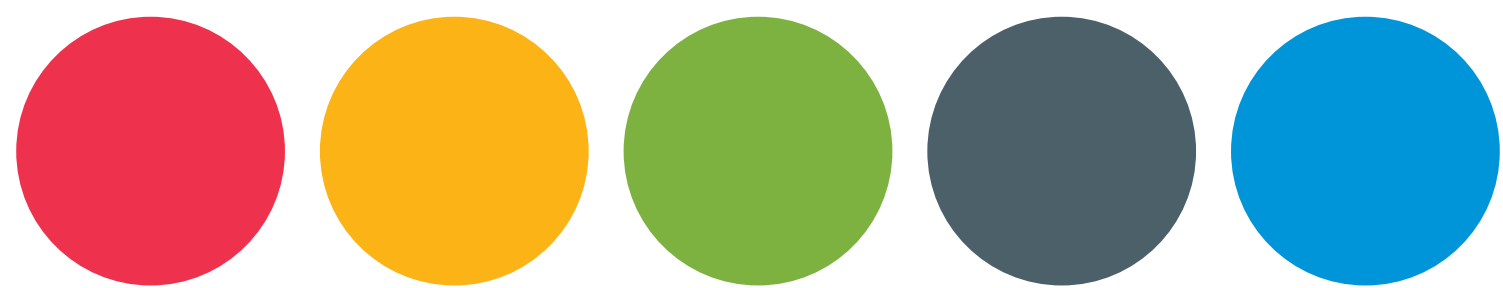

Thursday, May 22nd

Burnout Versus Balance: Developing Tools to Recognize and Manage the Impact of Work on Wellness

Lindsay Allotey, Clinical Operations Manager
Khaliah Harvey
Burnout Versus Balance is a presentation focused on helping participants identify symptoms of stress injuries, vicarious trauma, compassion fatigue and burnout. Participants will learn how these symptoms can present in their daily functioning and the impact these symptoms have on well-being as well as relationships. Participants will explore and learn about different skills as well as interventions that can be used to help counteract the impact of stress injuries, vicarious trauma, compassion fatigue, and burnout. Interactive discussions around preventative measures, behavioral adjustments, coping mechanisms, and resourcing will take place. Participants will also learn about the Responder Assistance Initiative.

NFPA Updates

Kelly Ransdell, Director, NFPA Public Education, NPFA
This session will address emerging trends that affect communities and their fire safety. We will explore new fire safety resources and ways to provide outreach to your community.

2025 Safe Kids North Carolina Conference

Concord, NC | May 19-22, 2025 | Event ID: 8123
